Additional Information/Support for Schoology:

- ▶ [Parent Guide](#)
- ▶ Multiple Children at Different Districts:
 - ▶ If your children attend different schools that are not in the same district (or are not part of the same Schoology Enterprise account), you will get an error message when you attempt to use the **Add Child** button to associate your parent account with their student account:
 - ▶ Parents must have an account at each of their children's schools.
 - ▶ For example, if you have one child at a High School in one district, and another child at a Middle School in a **different** district, you must have accounts at both districts and [link your accounts](#) together.
 - ▶ Linking accounts enables you to toggle between two or more accounts without having to log out and back in. Each district separately manages your parent accounts and can then communicate with you as necessary.
